[New video on the San Andreas Fault](#)

Nick Rousseau sent this link to a new video he has made about recent research along the Southern San Andreas Fault. It highlights the SoSAFE project supported by the US Geological Survey and the Southern California Earthquake Center.

[USGS - "SoSAFE" - The Southern San Andreas fault Evaluation Project](#)

It presents a nice overview, new graphics, new technology (including LiDAR), and a summary of new research. It is really nicely done!

Note also our related and recently produced video on LiDAR and earthquake hazards:
